

Forge SDK Namespace Tree

Unified API surface across TypeScript, Python, and Rust

SDK IMPLEMENTATIONS

TypeScript / JavaScript

```
import { ForgeClient }  
from '@forge/sdk';
```

Python

```
from forge import  
ForgeClient
```

Rust

```
use forge::client  
::ForgeClient;
```

Usage Example

```
const client = new ForgeClient({ tenantId }); await client.neuro.complete({ prompt, domain: 'code' });
```

All SDK implementations mirror this namespace tree for consistent API surface across languages.
