

# Product Lifecycle Diagram

Concept → Prototype → Alpha → Beta → GA → LTS → Deprecation → Sunset

## Release Gate Requirements (Beta → GA)

- Section 9: QA tests pass
- Section 11: Performance budgets met
- Section 12: Safety thresholds met
- Section 14: Multi-tenant compliance
- Section 16: Enterprise compliance
- Section 19: Evaluation passed
- Documentation complete
- Rollback plan prepared

## Release Channels

|              |                   |
|--------------|-------------------|
| Stable       | GA + LTS releases |
| Preview      | Beta releases     |
| Experimental | Alpha builds      |

## Versioning Standard

MAJOR.MINOR.PATCH+build

MAJOR — Breaking changes  
MINOR — New features +lts for LTS versions  
PATCH — Bug fixes only +forge for platform

Each stage has entry criteria and exit gates. No release (Beta → GA) occurs without passing all gate requirements.

Tie-back: Section 20 Product Release & Lifecycle Management Standard

□ Early   □ Internal   □ Preview   □ Production   □ LTS   □ End of Life
